TECHNICAL SKILLS

Python

Pandas , NumPy , Scikit-learn
Matplotlib

Web & API

Django , DRF , REST APIs
HTML , CSS , JS

Data & Databases

PostgreSQL , MySQL , SQLite
SQL , ORM , Data Cleaning

Dev Tools

Git , GitHub , Docker(basic)
Linux VPS , VS Code

LANGUAGES

Persian — Native
English — Professional
Croatian — Beginner (learning)

EDUCATION

PhD — Mathematics

Geometry, Topology &
Dynamical Systems
University of Yazd, 2014–2023

M.Sc. — Mathematics

Geometry & Topology
University of Yazd, 2011–2013

PROFESSIONAL SUMMARY

Data-focused Python developer with a PhD in Mathematics (Geometry, Topology & Dynamical Systems) and extensive university teaching experience in Statistics, Calculus, and Discrete Mathematics. Combines strong analytical foundations with hands-on skills in Python data analysis, PostgreSQL, Django, and machine learning. Relocating to Croatia in mid-2026; eager to contribute to a data engineering, analytics, or backend development team.

EXPERIENCE

University Lecturer — Mathematics & Engineering

Kerman National University of Skill · Bahmanyar University · Other institutions |
2014 – 2026

- Delivered undergraduate courses: Calculus, Engineering Mathematics, Statistics & Probability, Differential Equations, Discrete Mathematics
- Designed curricula and assessments for 200+ students per semester
- Applied mathematical modeling techniques directly transferable to ML and data science work

Technical & Financial Expert

Omran Mokran Development Company | 2023 – 2026

- Performed financial analysis of purchasing and sales transactions using Excel
- Developed Python scripts to automate repetitive file management and reporting tasks

PROJECTS

Personal Portfolio & Blog (Django)

Live Demo: <https://afsanehhassani.com/>

Github: <https://github.com/Afsaneh-hassani/portfolio-afsaneh>

- Built and deployed a Django portfolio site with blog, contact form, RSS feed, and about page; hosted on Render
- Stack: Python · Django · PostgreSQL · Render

Tehran Real Estate Data Pipeline (Python · Scikit-learn · FastAPI · GitHub Pages)

Live Demo: <https://afsaneh-hassani.github.io/tehran-house-price-prediction/>

Github: <https://github.com/Afsaneh-hassani/tehran-house-price-prediction>

- Built an end-to-end ML pipeline to predict Tehran apartment prices using Kaggle data, achieving $R^2=0.75$ with Random Forest across multiple compared models
- Deployed a FastAPI backend on Render and a Persian-language frontend on GitHub Pages, enabling real-time price prediction via a public URL..

B.Sc. — Applied Mathematics

Shahid Bahonar University,
Kerman, 2007–2011

CERTIFICATIONS

Python Programming
Fundamentals
Maktabkhooneh, 2024

Advanced Python Programming
Maktabkhooneh, 2024

Machine Learning with Python
Maktabkhooneh, 2024

Django Web Development
Maktabkhooneh, 2025

Django Blog Platform

Live Demo: <https://django-blog-platform-olah.onrender.com/>

Github: <https://github.com/Afsaneh-hassani/django-blog-platform>

- Full-featured blog platform with user authentication (register/login), categorized posts with tagging, view counter, contact form, and Django admin panel
- Designed relational database schema (5 tables: Post, User, Category, Tag, Contact) using Django ORM and SQLite

Client Portfolio Website (Freelance)

Live Demo: <http://mrsafa.ir/>

Github: <https://github.com/Afsaneh-hassani/safaportfolio>

- Developed and delivered a professional portfolio website for a real client, including biography, skills showcase, services, projects gallery, and contact form
- Deployed to cPanel hosting with Django Admin for dynamic content management
